

 **CALICO**®
LIGHT WEAPON SYSTEMS

Beginning in October of 1982, California Instrument Company designed and built specialized instrumentation for the petroleum industry. Armed with a background in tooling and engineering, a totally new concept in firearms magazine technology was developed and in May of 1985, the first working 100 round helical feed .22LR carbine prototype was successfully tested. Eventually, an entire family of firearms was developed around this revolutionary new design.

By June of 1989 the first 50 and 100 round 9mm "double helix" firearms were being produced. These robust weapon systems were hailed internationally as the next generation in firearms development. Enjoying world-wide success, Calico Light Weapon Systems now features a full line of Calico accessories, like the world's only true speed-loader, making it easy to capture the full advantage of this unique design.

Always looking to the future, Calico engineers are currently developing new weapons and munition feeding systems that take advantage of our internationally-patented design configurations. At Calico, we're committed to our "revolution in firepower".

Helical Feed Magazine

The heart of Calico's weapon systems is the patented helical feed design. Using a staggered helix principle, the rounds are driven forward along a fluted cartridge carrier as they press against the helical walls of the magazine cover. The driving pressure is achieved by a rectangular torsion spring located inside the fluted cartridge carrier. Moving forward one by one, they are fed by a specially-designed feed port into the top-loading chamber of the Calico firearm. Calico's helical magazine feeding systems remain the most advanced method known for efficiently storing and dispensing ammunition in small arms.

En octobre 1982 la société California Instrument, met au point et fabrique des équipements spéciaux pour l'industrie pétrolière. Grâce à cette expérience de conception et de travail, la société invente un procédé totalement nouveau en matière de chargeur pour armes à feu. En mai 1985, ils testent avec succès le premier prototype fonctionnant, la carabine 22R à alimentation par hélice de 100 cartouches. En fin développent une gamme complète d'armes à feu à partir de ce nouveau modèle révolutionnaire.

En Juin 1989, les premières "armes hélicoidales" de calibre 50 et 100 cartouches 9 millimètres étaient en cours de production. Ces systèmes d'armes robustes furent vendus au niveau international comme étant la prochaine génération dans le développement des armes à feu. Jouissant d'un succès à échelle mondiale, les systèmes d'armes légères Calico offrent actuellement une ligne complète d'accessoires Calico, tel l'unique chargeur rapide qui permet de réaliser quel est l'avantage réel de ce modèle unique.

Toujours engagés vers l'avenir, les ingénieurs de Calico développent actuellement des systèmes d'armes nouvelles qui profitent des configurations de nos modèles brevetés internationaux. A Calico, nous sommes déterminés à créer une révolution en matière d'armes à feu.

Alimentation Par Hélice

Le centre d'intérêt des systèmes d'armes légères Calico est le concept de l'alimentation par hélice. Utilisant un principe à hélice tournante les cartouches sont poussées vers l'avant le long d'un support de cartouches cannelé alors qu'elles pressent contre la partie intérieure du mur à hélice du couvercle du chargeur. La pression de conduite est exercée grâce à un ressort de torsion rectangulaire à l'intérieur du support de cartouches cannelé. Se déplaçant vers l'avant elles sont alimentées grâce à la chambre supérieure de charge de l'arme à feu Calico. "Le système d'alimentation par hélice demeure la méthode connue la plus avancée pour emmagasiner et distribuer d'une manière efficace les munitions dans les petites armes."

A principios de octubre de 1982 la compañía California Instrument diseñó y fabricó instrumentos especializados para la industria petrolífera. Gracias a la experiencia en montaje e ingeniería, un concepto completamente nuevo en la tecnología de depósitos de cartuchos para armas de fuego fue desarrollado y en mayo de 1985, el primer prototipo funcional, la carabina .22LR de alimentación helicoidal de 100 cartuchos fue sometido a prueba con éxito. Con el tiempo, se produjo una familia completa de armas de fuego en torno a este nuevo diseño revolucionario.

En junio de 1989, las primeras armas de fuego de "doble hélice" de 50 y 100 cartuchos 9 mm se estaban fabricando. Estos sistemas de armas robustas fueron reconocidos a nivel internacional como la próxima generación en la producción de armas de fuego. Los sistemas de armas ligeras Calico, gozando de éxito mundial, actualmente ofrecen una completa línea de accesorios Calico como el verdadero y único cargador rápido del mundo que permite captar fácilmente la máxima ventaja de este incomparable diseño.

Siempre viendo hacia el futuro, los ingenieros de Calico están desarrollando actualmente nuevas armas en sistemas de alimentación de municiones para sacar partido de las configuraciones del diseño patentado a nivel internacional. En Calico, estamos resueltos a llevar a cabo una "revolución" en cuanto a armas de fuego.

Alimentación Helicoidal

Lo esencial de los sistemas de armas ligeras Calico es el patentado diseño de alimentación helicoidal. Usando un principio de hélice alternada, los cartuchos son impulsados hacia adelante a lo largo de un portador de cartuchos acanalado ejerciendo presión contra la parte interior de la pared helicoidal de la cubierta del cargador. Esta presión impulsora es realizada por un resorte de torsión rectangular al interior del portador de cartuchos acanalado. Desplazándose hacia adelante uno por uno, los cartuchos son introducidos por una puerta especialmente diseñada hacia la recámara superior en las armas de fuego Calico. "El sistema de alimentación helicoidal del depósito de cartuchos sigue siendo el método más avanzado, conocido por almacenar y distribuir de manera eficaz las municiones en armas pequeñas."

SPORTING GOODS DEALER CONDITIONS OF SALE

SALES: CALICO LIGHT WEAPON SYSTEMS FIREARMS AND ACCESSORIES WILL BE SOLD ONLY TO AUTHORIZED FIREARMS DEALERS ("CUSTOMER") WITH VALID FEDERAL FIREARMS LICENSES. ALL SALES ARE FINAL UPON DELIVERY, AND ACCEPTANCE BY CUSTOMER.

ORDERS: ALL ORDERS, WHETHER SOLICITED OR UNSOLICITED, ARE SUBJECT TO ACCEPTANCE IN WHOLE OR PART, UPON THEIR RECEIPT BY US AT BAKERSFIELD, CALIFORNIA, AND TO OUR ABILITY TO FILL ANY ORDERS SO ACCEPTED. IN ADDITION, CALICO LIGHT WEAPON SYSTEMS WILL BE UNDER NO LIABILITY WHATSOEVER TO ANY CUSTOMER FOR OUR FAILURE OR REFUSAL TO ACCEPT ANY ORDER, OR ONCE ACCEPTED FOR OUR FAILURE TO FILL ANY ACCEPTED ORDER, WHEN SUCH FAILURE TO FILL IS DUE TO CAUSES BEYOND OUR CONTROL. ORDERS MUST INCLUDE FULL DESCRIPTION OF MERCHANDISE ORDERED, INCLUDING ARTICLE NUMBER. ORDERS MAY BE PAID BY CHECK, MONEY ORDER, OR C.O.D.

SHIPPING: CALICO LIGHT WEAPON SYSTEMS PRODUCTS WILL BE SHIPPED F.O.B. BAKERSFIELD, CALIFORNIA. CUSTOMER WILL BE INVOICED ACTUAL SHIPPING CHARGES. ANY DAMAGE OR LOSS OF GOODS IS AT CUSTOMER'S RISK. ALL CLAIMS FOR DAMAGES OR DISCREPANCIES IN SHIPMENT MUST BE FILED WITH THE CARRIER WITHIN 5 DAYS OF RECEIPT OF SHIPMENT. A MISSING SHIPMENT SHOULD BE REPORTED TO CALICO LIGHT WEAPON SYSTEMS WITHIN 15 DAYS OF INVOICE DATE.

C.O.D.: C.O.D. SHIPMENTS NORMALLY ARE FOR CASH, MONEY ORDER OR CERTIFIED CHECK. PRIOR APPROVAL FROM OUR CREDIT DEPARTMENT IS REQUIRED TO ALLOW C.O.D. PAYMENT BY COMPANY CHECK.
DISCOUNT TERMS DO NOT APPLY TO C.O.D. ORDERS.

RETURNS: ALL SALES ARE FINAL. NO MERCHANDISE MAY BE RETURNED WITHOUT PRIOR WRITTEN AUTHORIZATION OF CALICO LIGHT WEAPON SYSTEMS. IF MERCHANDISE IS RETURNED FOR EXCHANGE OR CREDIT, A 20% HANDLING CHARGE, FREIGHT PREPAID BY CUSTOMER, IS APPLIED.

BACK ORDERS: ALL BACK-ORDERED ITEMS ARE ROUTINELY SHIPPED AS THEY BECOME AVAILABLE, AT THE PRICE IN EFFECT AT THE TIME OF SHIPMENT. ANY CANCELLATION MUST BE IN WRITING.

LIMITATION OF LIABILITY: CALICO LIGHT WEAPON SYSTEMS' LIABILITY AND CUSTOMER'S REMEDY, WHICH IS HEREBY MADE EXCLUSIVE, IS EXPRESSLY LIMITED, AT OUR OPTION, TO EITHER THE REPAIR OF NON-CONFORMING MERCHANDISE OR THE REPAYMENT OF THE PURCHASE PRICE IF THE NON-CONFORMING MERCHANDISE IS RETURNED.
THE REMEDIES OF CUSTOMER SET FORTH IN THESE CONDITIONS OF SALE ARE EXCLUSIVE. CALICO LIGHT WEAPON SYSTEMS, SHALL NOT IN ANY CASE BE LIABLE FOR SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES.

CONSUMER WARRANTY: ALL CALICO LIGHT WEAPON SYSTEMS PRODUCTS ARE OFFERED TO CUSTOMERS WITH A 90 DAY LIMITED WARRANTY FROM THE DATE OF CONSUMERS PURCHASE. CALICO LIGHT WEAPON SYSTEMS MAINTAINS THE ONLY AUTHORIZED WARRANTY SERVICE CENTER FOR CALICO LIGHT WEAPON SYSTEMS FIREARMS. CONSULT OUR CUSTOMER SERVICE PRIOR TO SENDING CONSUMER'S PRODUCT TO US FOR WARRANTY REPAIR.

SOLE AGREEMENT: THESE CONDITIONS OF SALE CONTAIN THE ENTIRE AGREEMENT BETWEEN CALICO LIGHT WEAPON SYSTEMS AND CUSTOMER. THE AGENTS, EMPLOYEES AND REPRESENTATIVES OF CALICO LIGHT WEAPON SYSTEMS ARE NOT AUTHORIZED TO MODIFY THESE CONDITIONS.
ANY ACTION FOR BREACH OF THESE CONDITIONS MUST BE COMMENCED WITHIN 13 MONTHS FOLLOWING CUSTOMER'S RECEIPT OF THE MERCHANDISE.

A REVOLUTION IN FIREPOWER

Patented Helical Feed Design • 50 and 100 Rounds Capability

CALICO®

LIGHT WEAPON SYSTEMS

405 East 19th Street • Bakersfield, CA 93305

805/323-1327 • FAX: 805/323-7844

50 or 100 round capacity, right on target!

The weapon systems designed and manufactured by Calico have begun a revolution in firepower. Calico's internationally-patented helical feed magazine design has enabled it to offer significant improvements over typical rifle and pistol configurations. These advancements combine to create some of the most accurate, lightweight, and reliable firearms available.

- Extra-strength, high-tech materials are used throughout the design to enhance performance, reduce weight, and provide durability.

- The center of gravity is positioned over the shooter's wrist providing better balance, greater accuracy, ease of handling, and less fatigue.

- The grip is located directly behind the barrel centerline, offering greatly reduced recoil effects and enhancing hit probability shot after shot. The fully-adjustable front sight post is complemented by the rear flip sight which offers a 'combat' or 'ghost ring' selection.

- Calico's top-loading, bottom-ejecting action enhances safety during close-quarter operation, since ejected brass travels straight down. This allows for use of a practical brass catcher. Bottom ejection also makes for a truly ambidextrous firearm, with the safety selector on both the right and left sides of the weapon.

- The static cocking lever provides an additional level of safety and reliability, since it remains stationary as the firearm is discharged.

- A two-position bolt catch holds the bolt at half-open for chamber inspection, or fully-opened for complete inspection and ready to chamber a new round.

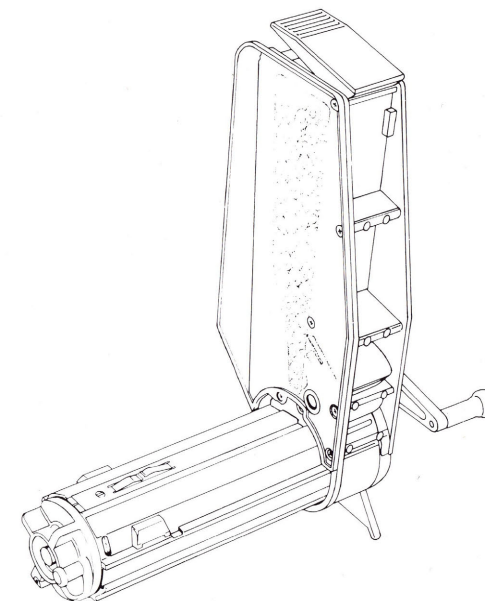

- Since no bulky magazine protrudes below the weapon to impede movement or operation, the shooter may assume a very low profile.

- Calico firearms field-strip in seconds without tools, and the entire bolt assembly is removable as a single unit.

- Calico's unique magazine can be stored fully loaded for an indefinite period of time without experiencing 'spring set' and can be charged in seconds for use. The two-phase clutch allows tension release for re-storage.

- The moveable feed lip on the magazine allows for rapid loading and unloading. (Optional speed loader available.) Visual count apertures on the top of the magazine indicate the current ammunition inventory.

A full line of Calico accessories are available to customize your firearm to specific applications. Ask your dealer for details.
